## COLD CHAIN MANAGEMENT PROGRAM REQUIREMENTS

Giant Eagle will be using the YellowTempTale4 recorder exclusively. **This model is the only electronic temperature monitor Giant Eagle receiving centers are equipped to read and receive.**

When using the Yellow TempTale4 electronic temperature recorder, the instrument should be identified by the 10 digit serial number and brand on the bill of lading. The Purchase Order should also be written on the device in order to track information throughout distribution. Recorders should be placed on a box, on the last left rear Giant Eagle pallet around eye level. The device must be initiated by pressing the start button; recording will begin after 30 minutes. Failure to properly equip perishable loads with the specified recording device(s) may result in refusal of the load.

Each product category has a specific recording device to be ordered for the particular product category that will be tracked during each shipment. The table below identifies the temperature range and corresponding recording device. Actual acceptable temperature ranges of the product may vary depending on the specific product and appropriate regulation. If the temperature recording device shows the ambient temperature has been over the maximum temperature for over 4 hours, Giant Eagle will make a determination to accept or reject the load based upon the highest temperature during transit, the temperature of the product upon receipt, the duration of the breach of temperature and the overall quality/safety of the finished product.

### Temperature Recorder Set Points

Product Type	Temperature Recorder Order #	High Temp Set Point	Low Temp Set Point
Dairy Products (Milk, Cheese, Yogurt, etc.)	T4800-20-003	45F	32F
Eggs	T4800-20-003	45F	32F
